This is the text. Digital picture books will be hand held on a tablet one day soon. Their glowing colors will be enjoyed in a grownup's laps or under the covers at night. Creations reflect their creators. Despite what we've seen in adolescent digital products before now, there's no reason to believe that stories created in this new form by children's book writers and illustrators wouldn't be engaging, satisfying, even heart-warming, the kind kids think about for a whole week or a whole lifetime.
